Savant Announces Results of First Hole on the Parbec Gold Property

Vancouver, May 28, 2010 - Savant Explorations Ltd. (SVT.TSX-V) ("Savant") is pleased to announce the results of the first drill hole completed of the 8 planned holes on the Parbec Property. The first hole targeted the main Camp Zone structure at a depth of approximately 150 metres from surface. Significant results include 19.25 gpt gold (uncut) over 2.9 metres from the Camp Zone structure and 2.1 gpt gold over 2.5 metres from a second mineralized structure referred to as the North Veins locate 150 metres north of the Camp Zone structure. The North Veins have had little previous drill testing and the intersection remains open in all directions. A plan map showing the location of the drill hole and other planned holes is available on the Company's web site (<http://www.savantexplorations.com/>). Details of the results are listed in the following table.

Significant Results

Hole Number	Zone	From (metres)	To (metres)	Length (metres)	Au (gpt)
1	Camp Zone	175.6	178.5	2.9	19.25 (uncut)
1	<i>Including</i>	<i>175.6</i>	<i>176.5</i>	<i>0.90</i>	<i>38.1</i>
1		<i>176.5</i>	<i>177.35</i>	<i>0.85</i>	<i>21.6</i>
1		<i>177.35</i>	<i>178.5</i>	<i>1.15</i>	<i>2.76</i>
1	North Veins	382.0	384.5	2.5	2.10

** True widths are approximately 60% of drill interval*

The mineralized material in the Camp Zone structure occurs in a strongly silicified and pyritized talc chlorite schist containing between 1 and 3% finely disseminated arsenopyrite and has a strong resemblance to the mineralization at the nearby Lapa deposit. The Lapa Mine is Agnico Eagle's newly producing, high-grade underground (3.8Mt @ 8.8 gpt Au: 1.1 million ounces: Agnico-Eagle web page under "Operating Mines: Lapa," January 4, 2010), located 10 kilometres NW of Parbec along the Cadillac Deformation Zone (CDZ).

Since commencement of drilling on April 21, 2010, four angled (-55 degrees) drill holes of NQ calibre core have been completed for a total of 1,651 metres of drilling. Holes are generally spaced 200 metres apart within and mostly along strike within the targeted CDZ.

Individual hole lengths include: Par-10-01: 460 metres; Par-10-02: 250 metres; Par-10-03: 532 metres and Par-10-04: 409 metres. At the time of writing, a fifth hole, Par-10-05, is in progress at a depth of 350 metres. Core sampling for gold assaying has been completed for holes Par-10-01 & 02 and sampling of Par-10-03 is nearing completion. Tagging, cutting, bagging and shipping of Parbec core samples are performed in accordance with quality control industry standards. Samples are being delivered and processed by ALS Chemex Laboratories in Val d'Or, Quebec. Analytical results for all 121 samples from drill-hole Par-01-01 have been received and highlighted above while results for the 92 samples from hole Par-10-02 are pending. Sampling of core from holes Par-10-03 & 04 is in progress.

The Parbec Gold Property is located along the prolific Cadillac Break, 20 kilometres east of the Cadillac Gold

Camp (historic production of >8.7 Million ounces), Quebec's largest gold producing district, and 5 kilometres west and along strike from the historic Malartic Gold Camp where Osisko Mining is currently developing its large open pittable Canadian Malartic Gold Project estimated to contain a total in-pit measured and indicated reserve of 8.97 Million ounces (Osisko February 10, 2010 press release).

Savant can acquire a 100% interest in the Parbec Property through cash option payments totalling \$525,000 payable over 4 years, work commitments totalling \$3,850,000 over 4 years and the issuance of 750,000 Savant common shares to the vendor over a period of 3 years (Savant January 11, 2010 press release). A gross metal royalty (GMR) on gold production, will be payable to the vendor as follows: 1.0% GMR when gold is US\$1,000 per ounce or less; 1.5% GMR when gold is greater than US\$1,000 per ounce but less than US\$1,200 per ounce and 2.0% GMR when gold is greater than US\$1,200 per ounce. The initial option payment of \$25,000 and issuance of 100,000 common shares has been made.

Richard Cote, Ing., Vice President, Exploration of Savant is the Qualified Person, as defined by National Instrument 43-101, responsible for the technical data in this news release.

This news release contains forward-looking statements concerning the Parbec Property. These statements are based on assumptions and judgments of management regarding future events or results that may prove to be inaccurate as a result of failure to obtain necessary regulatory approvals, the failure to reach agreement on final documentation, exploration results and other risk factors that are beyond Savant's control. In particular, there is no certainty as the extent or continuity of the gold mineralization encountered in the initial drill hole at Parbec. There can be no assurance that such forward-looking statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements contained in this news release.
