**August 10, 2010****Savant Encounters Its Longest Gold Intercept in Final Hole of First Phase Drill Program at Parbec**

**Vancouver, August 10, 2010** - Savant Explorations Ltd. (SVT.TSX-V) ("Savant") have released results for the final three drill-holes of the first phase of drilling on the Parbec Project located along the Cadillac Break, 20 kilometres east of the Cadillac Gold Camp, Quebec's largest gold producing district, and 5 kilometres west and along strike from the historic Malartic Gold Camp where Osisko Mining is currently developing a large open pit on the Canadian Malartic Gold Project. The first phase of drilling was designed to test the property at approximately 200 metre intervals along the length of the property for extensions of the known gold mineralization. Significant intersections from the new drill holes include 28.6 metres averaging 1.37 gpt gold including 1.5 metres averaging 16.2 gpt gold.

The eighth hole (Par-10-08) located 200 metres northwest and along strike from earlier released hole Par-10-05, encountered similar broad gold mineralization in altered porphyry intrusive and adjacent sheared ultramafic rocks. Assay results of the zone averaged 1.37 gpt gold over 28.6 metres (including 16.2 gpt gold over 1.5 metres) at an average vertical depth of approximately 60 metres. This broad zone of gold mineralization associated with intrusive rocks also occurs in drill-hole Par-10-02 (1.0 gpt gold over 8.5metres), located 400 metres to the northwest of hole Par-10-08.

The seventh hole, Par-10-07, intersected 2.90 gpt gold over 2.25 metres (including 14.85 gpt gold over 0.40 metres) in the Camp Zone and several intercepts of anomalous levels of gold including 2.3 gpt gold over 0.45 metres, 0.39 gpt gold over 4.25 metres and 0.977 gpt gold over 1.9 metres in the North Veins Zone at vertical depths of between 190 and 215 metres.

The sixth and eastern most hole, Par-10-06, located 200 metres east of hole Par-10-05, intersected 1.43 gpt gold over 3.4 metres (including 3.36 gpt gold over 1.0 metre) at a vertical depth of 65 metres and approximately 60 metres south of the main Cadillac Deformation Zone (CDZ).

A plan map showing the location of the drill holes for the completed first phase drill program is available on the company's web site ([www.savantexplorations.com](http://www.savantexplorations.com)). Details of the results are listed in the following tables.

**Drilling Update**

<b>Hole Number</b>	<b>Zone</b>	<b>From (m)</b>	<b>To (m)</b>	<b>Core Length</b>	<b>Gold Grade (gpt)</b>	<b>Vertical Depth (m)</b>
8	Central Veins	84.0	112.6	28.6	1.37	58
8	including	89.4	90.5	1.1	2.08	59
8	including	93.5	95.0	1.5	16.2	60
8	Deep Intercept	542.8	543.15	0.35	2.58	325
7	Camp Zone	108.15	110.40	2.25	2.90	75
7	including	110.0	110.4	0.40	14.85	75
7	North Veins	320.3	320.75	0.45	2.30	190
7	North Veins	322.55	326.80	4.25	0.39	200
7	North Veins	335.5	337.4	1.9	0.977	215
6	Pontiac Veins	71.5	74.9	3.4	1.43	65

\* True widths are approximately 60% of drill interval.

Savant's eight (8) drill-hole drill program totalling 4,005 metres was completed on July 9, 2010. Analytical results for all eight drill holes have now been received and reported upon.

#### Aggregate of Significant Results from the 2010 Parbec Drill Program

Hole Number	Zone	From (m)	To (m)	Length (m)	Gold Grade (gpt)	Vertical Depth (m)
1	Camp Zone	175.6	178.5	2.9	19.25	150
1	North Veins	382.0	384.5	2.5	2.10	325
2	Central Veins	60.2	68.7	8.5	1.0	50
2	including	60.2	62.5	2.3	2.3	50
2	Central Veins	109.0	110.45	1.45	3.68	85
4	Camp Zone	281.5	283.0	1.5	1.68	220
5	Central Veins	291.15	301.10	9.95	1.03	225
5	Central Veins	342.1	349.0	6.91	1.89	275
5	Deep Intercept	644.55	646.0	1.45	2.23	510
6	Pontiac Veins	71.5	74.9	3.4	1.43	65
7	Camp Zone	108.15	110.4	2.25	2.90	75
7	North Veins	322.55	326.8	4.25	0.39	200
8	Central veins	84.0	112.6	28.6	1.37	58
	including	93.5	95.0	1.5	16.2	60

\* True widths are approximately 60% of drill interval.

Jack McClintock, President and CEO of Savant commented, "The discovery in drill-hole Par 10-08 of a broad zone of gold mineralization near surface and associated with altered porphyry intrusive rocks is very exciting as these intrusions appear to be the northwest strike extensions of the same series of porphyry intrusions that host gold mineralization at the Lapa-Cartier occurrence and East Amphi Deposit located respectively 1.2 kilometres and 1.5 kilometres southeast of Parbec on the adjacent Osisko Canadian Malartic Property."

Savant can acquire a 100% interest in the Parbec Property under a four year option agreement with Globex Mining Enterprises Inc., the terms of which have been previously divulged and can be viewed in detail on Savant's website ([www.savantexplorations.com](http://www.savantexplorations.com)).

John McClintock, P.Eng. President and CEO of Savant is the Qualified Person, as defined by National Instrument 43-101, responsible for the technical data in this news release.
