5,000 METER DRILL PROGRAM AT DUQUESNE WEST GOLD PROPERTY

Rouyn-Noranda, Quebec - GLOBEX MINING ENTERPRISES INC. (GMX-Toronto, G1M-Frankfurt and GLBXF-U.S. Pink Sheets) wishes to inform shareholders that Diadem (TSX-V DRL) have announced that in June, they will commence a 5,000 meter drill program on Globex's 50% owned Duquesne West gold property in Duparquet and Destor Township, Quebec.

The program will endeavour to build upon previous exploration effort by Kinross and Queenston which outlined a series of gold zones and isolated gold intercepts.

The Duquesne West Gold property straddles the gold localizing, regional, Porcupine-Destor Fault. Previous drill programs have indicated up to 16 gold zones four of which were the subject of a NI 43-101 study completed on February 16, 2003 by Reddick Consulting Inc. on behalf of Kinross Gold Corporation. The study indicated an inferred resource of 664,661 tonnes @ 11.33 g/t Au (uncut) using a 5.0 g/t Au minimum grade over a horizontal width of 2.0 metres. Alternately, an inferred resource of 1,067,033 tonnes grading 8.89 g/t Au was calculated using a 4.0 g/t Au minimum grade and a 2.0 metre horizontal width.
